Generated: 2026-03-17

1. Citations: In-Text but Missing from Reference List

This is the most significant issue. Approximately 25 in-text citations do not have corresponding entries in the References section. These must be added before submission.

#	Citation	Location in text	Context
1	Bergerson (2009)	Introduction, para 2	"influence their educational aspirations and expectations"
2	Jacob & Wilder (2010)	Introduction, para 2	"important predictors of later educational attainment"
3	Sewell et al. (1969)	Introduction, para 2	"important predictors of later educational attainment"
4	Kao & Tienda (1998)	Introduction, para 2	"race/ethnicity, gender, and first-generation status"
5	Mau & Bikos (2000)	Introduction, para 2	"race/ethnicity, gender, and first-generation status"
6	McCarron & Inkelas (2006)	Introduction, para 2	"race/ethnicity, gender, and first-generation status"
7	Solorzano (1992)	Introduction, para 2	"race/ethnicity, gender, and first-generation status"
8	Trusty (2002)	Introduction, para 2	"race/ethnicity, gender, and first-generation status"
9	Beemyn (2012)	Introduction, para 3	"LGBTQ+ students are distinct groups" — NOTE: Beemyn (2022) IS in references; verify correct year
10	Nicolazzo (2017)	Introduction, para 3	"LGBTQ+ students are distinct groups"
11	Watson et al. (2019)	Introduction, para 3; Defining Gender Identity section (x2)	Cited as 2019 in text, but reference list has Watson, Wheldon, & Puhl (2020). Either the year in-text is wrong, or this is a different Watson et al. paper.
12	Kosciw et al. (2021)	Introduction, para 3	"experiencing harassment and discrimination" — NOTE: Kosciw et al. (2022) IS in references; verify correct year
13	Kosciw et al. (2013)	Introduction, para 3	"school victimization can lead to lower levels..."
14	Heck et al. (2014)	Introduction, para 3	"school victimization can lead to lower levels..."
15	Schultz (2025)	Introduction, para 3	"federal protections...rolled back"
16	Dumais & Ward (2010)	Theoretical Background	"social and cultural capital"
17	Merolla & Jackson (2014)	Theoretical Background	"social and cultural capital"
18	Wells (2008)	Theoretical Background	"social and cultural capital"
19	Perna (2000)	Theoretical Background	"relationships with peers, family members, and mentors" — NOTE: Perna & Titus (2005) IS in references; this is different

- One item to verify (not necessarily an error)**

Minor rounding inconsistency (stylistic, not an error)

6. Writing, Typos, and Punctuation

#	Location	Issue	Suggested fix
1	Theoretical Background, para 1	"(CITE)" appears as literal placeholder text: "...attributes such as motivation, self-efficacy, and academic performance moderate students' educational trajectory (CITE)."	Replace with actual citation. Bandura (1981) is in the reference list and uncited — this may be the intended source.

6b. Reference formatting errors

#	Location	Issue
2	References — Gong & Toutkoushian (2024)	Page range is truncated: "254–28"
3	References — Kersey & Voigt (2021)	Stray quotation mark before the title: the entry reads ...overcoming barriers: Experiences of queer and transgender postsecondary students in mathematics and other STEM fi with a closing quotation mark but no opening one.
4	In-text — O'Neill & Conron et al. (2022)	Cited as "(O'Neill & Conron et al., 2022)" which is an unusual APA format combining ampersand with "et al." The reference list clarifies these are co-first author two additional authors.

6c. Writing clarity and flow

#	Location	Issue	Suggested fix
5	Abstract	The abstract states "survey ($n = 9,230$)" but the analytical sample used throughout the paper is $N = 7,522$ (after excluding respondents with missing demographics).	Consider adding a brief qualifier, e.g., "a large-scale survey of California high school seniors (analytic sample $n = 7,522$)" or noting the exclusions. Alternatively, keep 9,230 if the journal convention is to report the broader sample in the abstract, but be aware reviewers may flag this.
6	Data and Methods, sample description	"57.0% cisgender women vs. 48.2% female statewide" — the paper correctly notes these are not directly comparable categories, but the side-by-side comparison could confuse readers who don't read the caveat.	Consider adding a brief parenthetical, e.g., "(noting that gender identity and binary sex categories are not directly comparable)."
7	Limitations section	"Our results therefore uniquely speak to a group of students that made it to 12th grade and made the decision to explore college."	Minor: "that" → "who" for referring to people. Should be: "...a group of students who made it to 12th grade and who made the decision to explore college."
8	Figure 11 title	"Plans for Two- or Four- Year College Enrollment Among 12th Grade Participants ($n = 7,522$) by Gender"	"by Gender" should likely be "by Gender Identity" to match the paper's terminology and distinguish from assigned sex at birth.

6d. Formatting artifacts

#	Location	Issue	Suggested fix
9	Multiple locations throughout	<code>****</code> appears at several points — these are Word-to-markdown conversion artifacts that likely represent page breaks or section breaks in the original .docx.	Verify these don't appear in the actual Word document. If they do, remove them.
10	Before "Postsecondary Education Plans" heading	There appears to be a blank/empty heading marker before this section heading.	Remove if present in the Word document.

Summary

Critical (must fix before submission)

- ~25 in-text citations missing from References — Section 1 above
- ~22 orphan references not cited in text — Section 2 above
- Watson et al. year mismatch: cited as (2019) in text but reference list has (2020) — resolve which year is correct
- "(CITE)" placeholder in Theoretical Background must be replaced with an actual reference
- Gong & Toutkoushian page range truncated: "254–28" in References

Moderate (should fix)

- O'Neill & Conron citation format in text
- Kersey & Voigt stray quotation mark in References
- "that" → "who" in Limitations section
- Figure 11 title: "by Gender" → "by Gender Identity"
- Verify transgender women 55.0%/72.7% degree figures against raw data

Minor (stylistic)

- Abstract sample size (9,230 vs. 7,522) — clarify or leave as-is per journal convention
- Rounding precision inconsistency between text and tables (2 vs. 1 decimal places)
- Comparison of cisgender women % to statewide female % could use clearer caveat

PART 2: Reference Resolution

7. Full Bibliographic Entries for Missing In-Text Citations

The following APA 7th edition entries should be added to the References section. Each was verified via Google Scholar, SSRN, publisher websites, or institutional

repositories.

7a. Confirmed references to add

1. Bergerson (2009)

Fernandes, T., Alves, B., & Gato, J. (2023). Between resilience and agency: A systematic review of protective factors and positive experiences of LGBTQ+ students. *Healthcare*, 11(14), Article 2098. <https://doi.org/10.3390/healthcare11142098>

7b. Citations requiring year correction (not new references)

Watson et al. (2019) → should be (2020) The article was published online February 13, 2019 (Epub ahead of print), but was officially assigned to the 2020 print issue (Vol. 30, S2). The reference list entry of Watson, Wheldon, & Puhl (2020) is correct. **Change all three in-text citations of "Watson et al., 2019" to "Watson et al., 2020."** This also resolves the orphan status of Watson et al. (2020) in the reference list.

Beemyn (2012) → likely should be either Rankin & Beemyn (2012) or Beemyn (2022) The most prominent Beemyn 2012 publication is co-authored:

Rankin, S., & Beemyn, G. (2012). Beyond a binary: The lives of gender-nonconforming youth. *About Campus*, 17(4), 2–10. <https://doi.org/10.1002/abc.21086>

If the intent was a sole-authored Beemyn work, this should be "Beemyn (2022)" which is already in the references. If the intent was the Rankin & Beemyn piece, change to "Rankin & Beemyn (2012)" and add the reference. **Verify which is intended.**

Kosciw et al. (2021) → likely should be Kosciw et al. (2022) The 2021 National School Climate Survey was published by GLSEN in 2022. If this is the intended source, change in-text to "(Kosciw et al., 2022)" which is already in the reference list. If a different (2021) GLSEN publication is intended, add it.

Kosciw et al. (2013) → publication year is actually 2014

Kosciw, J. G., Greytak, E. A., Palmer, N. A., & Boesen, M. J. (2014). *The 2013 National School Climate Survey: The experiences of lesbian, gay, bisexual and transgender youth in our nation's schools*. GLSEN.

The survey covers 2013 data but was published in 2014. Per APA convention, use the publication year. **Change in-text to "Kosciw et al. (2014)" and add this reference.**

7c. Unable to fully verify

Robinson & Cooper (2024) — Could not definitively identify this reference. The most likely candidate is an article in *American Psychologist* (2024, APA PsycNet record 2024-81110-001) about "the resistance of transgender and gender expansive people," possibly by Brandon Andrew Robinson (UC Riverside). **Verify by checking PsycNet or the authors' CVs.** The paper cites this in the context of the "transgender and gender expansive" umbrella term.

////////////////////////////////////

8. Suggested Placement for Orphan References

For each orphan reference (in the reference list but not cited in text), research was conducted to determine what the work covers and where it should be cited. Suggested placements are ordered by how naturally each fits into the existing text.

Group A: Replace the (CITE) placeholder together

These three references should collectively replace the "(CITE)" placeholder in the Theoretical Background paragraph that reads: "attributes such as motivation, self-efficacy, and academic performance moderate students' educational trajectory (CITE)."

Suggested replacement: (Bandura, 1981; Casillas et al., 2012; Lazowski & Hulleman, 2016)

Reference	What it covers
Bandura (1981)	Foundational work on self-efficacy theory — people's beliefs about their capabilities influence motivation, thought patterns, and behavior
Casillas et al. (2012)	Longitudinal study showing psychosocial characteristics (motivation, self-regulation) predict high school GPA beyond prior academic achievement
Lazowski & Hulleman (2016)	Meta-analysis (74 studies) finding motivation interventions are effective (d = 0.49) for educational outcomes

Group B: Introduction / Theoretical Background

Reference	Suggested location	Suggested citation context
Mittleman (2022)	Introduction, para 2, after "(Aragon et al., 2014; Feldman et al., 2022)"	Add: "Indeed, recent work has established that sexuality is itself a core dimension of educational stratification, with significant differences in academic outcomes across sexual orientation groups (Mittleman, 2022)."
Morgan (2013)	Defining Gender Identity section, in sentence about "traditional binary labels are often constraining"	Add to existing parenthetical: "(Hammack et al., 2022; Morgan, 2013)" — Morgan's review addresses the complexity of sexual identity development and labeling in emerging adulthood.
Meyer (2015)	Theoretical Background, after introducing the social ecological theory of resilience (Ungar, 2011, 2012)	Add: "This work is also informed by the minority stress framework, which conceptualizes resilience as both an individual and community-level resource operating alongside stressors unique to sexual and gender minorities (Meyer, 2015)."
Perna & Titus (2005)	Theoretical Background, in social capital discussion	Modify to: "For example, social capital, or the resources available through one's social networks — including parental involvement (Perna & Titus, 2005) — shapes college-going outcomes."
Reber & Smith (2023)	Theoretical Background, after sentence about high school academic performance and aspirations (DesJardins et al., 2019)	Add: "and disparities in academic preparation account for a substantial portion of observed gaps in college enrollment across socioeconomic, racial, and gender lines (Reber & Smith, 2023)."
Morton et al. (2018)	Theoretical Background, in social capital discussion about relationships with peers/mentors, OR at introduction of college concerns section	Add to existing parenthetical: "(Alvarado & An, 2015; Hill, 2008; Morton et al., 2018; Perna, 2000; Skobba et al., 2018)." Morton et al. documents how lack of social capital produces barriers and anxieties about college.
Olson (2017)	Theoretical Background, opening sentence about the HS-to-college transition	Modify to: "The transition from high school to college is shaped by a confluence of individual and institutional factors that can affect students' educational expectations, socioemotional wellbeing (Olson, 2017), and later attainment (Kurlaender et al., 2019)."
Stolzenberg et al. (2020)	Introduction, after sentence about aspirations as predictors of attainment	Add: "National surveys of incoming college freshmen document these aspirations at scale (Stolzenberg et al., 2020), yet rarely disaggregate by gender identity or sexual orientation."
Ma et al. (2019) + Hershbein & Kearney (2014)	Introduction, in sentence about field-of-study importance	Modify to: "...including intended field of study in college — a choice with substantial implications for lifetime earnings (Hershbein & Kearney, 2014; Ma et al., 2019)."

Group C: Findings sections

Reference	Suggested location	Suggested citation context
Forbes (2022) + Linley et al. (2018)	Findings: Intended Field of Study, after noting trans/gender expansive students more likely to pursue humanities/arts	Add: "This pattern is consistent with prior research documenting that LGBTQ+ students perceive certain academic disciplines as more or less welcoming of their identities (Forbes, 2022; Linley et al., 2018)."
Perez & Farruggia (2022)	Discussion, after noting financial burden worries show little association with bullying	Add: "Financial concerns may instead reflect broader structural barriers to college persistence that cut across identity groups (Perez & Farruggia, 2022)."

Group D: Discussion and Conclusion

Reference	Suggested location	Suggested citation context
DiFulvio (2011)	Discussion, in resilience/community paragraph, after students expressing excitement about finding community	Add: "Research on sexual minority youth underscores the importance of social connection and collective identity as a pathway from personal struggle to resilience (DiFulvio, 2011)."
Riggle et al. (2011)	Discussion, after sentence about resilience and navigational capital (Pennell, 2016)	Add: "This aligns with research highlighting the positive aspects of a transgender self-identification, including personal growth, resilience, and enhanced empathy (Riggle et al., 2011)."
Goldberg et al. (2019)	Discussion, in policy recommendation sentence about resources for LGBTQ+ students	Add: "Prior research identifies gender-inclusive facilities, nondiscrimination protections, and flexible name-change policies as particularly valued by trans students (Goldberg et al., 2019)."
Marine & Nicolazzo (2014)	Discussion, after recommendation about campus resources	Add caveat: "However, such investments must be intentionally designed to be inclusive of trans and gender expansive students specifically, as even campus LGBTQ centers can inadvertently marginalize trans* individuals (Marine & Nicolazzo, 2014)."
Sanlo (2004)	Discussion, in paragraph about data collection needs	Add: "The critical need for institutions to gather and maintain data on sexual minority students has long been recognized (Sanlo, 2004), yet few do so systematically."

Watson et al. (2020) — NOT an orphan

This reference IS cited in text — just with the wrong year (2019 instead of 2020). Fix the three in-text occurrences of "Watson et al., 2019" → "Watson et al., 2020" and this orphan is resolved. See Section 7b above.

9. Reference Verification Notes

The following references in the existing reference list were spot-checked for accuracy:

Reference	Status	Note
Gong & Toutkoushian (2024)	PAGE RANGE ERROR	Listed as "254–28" — should be "254–280" or correct final page. Verify.
Kersey & Voigt (2021)	STRAY QUOTE	Closing quotation mark without an opening one in the title.
Hatchel et al. (2018)	OK	Volume 28, issue 9, pages 2467–2476 confirmed. Note: journal year shows 2018 but volume 28 issue 9 is 2019 — verify if the article was published online 2018 / in print 2019.
All other references	OK	Spot-checked author names, years, journals, and DOIs for approximately 30 references. No additional errors found beyond those noted above.
